Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

NT

Office Action Summary	Application No. 10/822,393	Applicant(s) DABAH, SOLOMON	
	Examiner Jila M. Mohandesi	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 3-18 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 and 3-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1 and 3-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howell (US pub. No. 2004/0237351) in view of Lyons (US patent no. 4,582,297). Howell discloses a shoe comprising: and upper; a midsole coupled to said upper (layer above the outsole, not numbered); an outsole fastened to said midsole; and a spinner element rotably mounted to at least one of said upper and said midsole for plain fun for the kids. See Figure 1 and the claim. Howell is silent about the type of spinner. Lyons discloses a wind actuated decorative spinner including a hub with plurality of spokes radiating from the hub, and the spinner is mounted by a pin projection. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was

made to provide the spinner of Lyons to the footwear of Howell to make the footwear more pleasing to the consumer.

With respect to the location of the spinner on the shoe, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the location of the spinner on the shoe of Winford since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

4. Claims 1 and 3-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winford et al. (Pub. No. US 2004/0159022) in view of Misevich et al. (4,854,057). Winford discloses all the limitations of the claim including the following: a shoe having an upper (14); an outsole (12) fastened to said upper; and a spinner (rotating discs 50a, 50b and 50c) which is at least operatively connected to the sole (see Figure 1); at least one spinner being rotatable with respect to the shoe. The spinners (discs 50a, 50b and 50c) are capable of free rotation after a torque temporarily is applied to them. Winford does not appear to teach the shoe comprising a midsole coupled to the upper. Misevich '057 discloses that it is desirable to have a midsole fastened to an outsole in a shoe to provide added comfort to the wearer. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a midsole to the shoe of Winford as taught by Misevich '057 for added comfort to the wearer.

With respect to the location of the spinner on the shoe, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the location of the spinner on the shoe of Winford since it has been held that

rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

With respect to claims 3, 6 and 10, Winford discloses that the rotating discs have illustrated thereon a design of a hubcap or other spoke arrangements to enhance the illusion of rotating wheels. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the discs in the shape of a hub with spokes to further enhance the illusion of the rotating wheels.

Response to Arguments

5. Applicant's arguments filed 11/06/2006 have been fully considered but they are not persuasive. Contrary to applicant's argument the spinners (discs 50a, 50b and 50c) of Winford are capable of free rotation after a torque temporarily is applied to them.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are shoes analogous to applicant's instant invention.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3728

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jila M. Mohandesi whose telephone number is (571) 272-4558. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
